

Microsoft 365 E7

# The Frontier Suite

## Microsoft 365 E7 gives partners a clear, differentiated platform motion to lead customers into the Frontier Firm era.

AI is moving fast—from early experimentation to everyday business impact. Frontier firms are leading this shift by making AI a core operating capability, embedded into how work gets done. Microsoft 365 E7 provides the secure, integrated foundation these organizations need to scale AI confidently—bringing productivity, security, identity, and compliance together so innovation can move forward without added complexity or risk.

## Built for Enterprise-Scale AI

Confidently move from AI pilots to enterprise-wide impact

- ✓ **Move from pilots to production with confidence**  
ME7 supports real-world AI adoption across everyday workflows.
- ✓ **Designed to scale AI across the organization**  
Enable consistent AI experiences across teams, roles, and functions.
- ✓ **Ready for AI and agent-driven work**  
Support AI-powered and agent-enabled workflows as they become core to operations.
- ✓ **Built to support enterprise performance and resilience**  
Scale AI without sacrificing reliability, security, or operational stability.

### ME7 Frontier Suite

#### Microsoft 365 E5

The security and compliance foundation for enterprise-grade productivity

#### Microsoft Entra Suite

Identity, access, and policy enforcement for autonomous systems

#### Microsoft 365 Copilot

AI embedded across the flow of work

#### Microsoft Agent 365

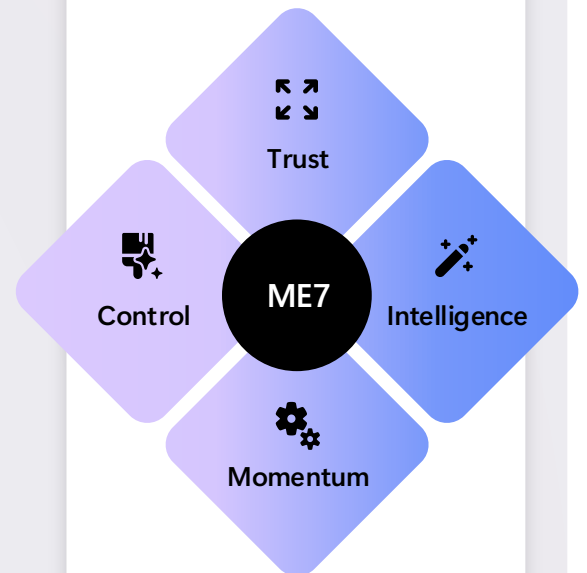

Discovery, governance, and lifecycle management for AI agents

## One Integrated Solution, Greater Value

Reduce complexity with a single, unified AI foundation

- ✓ **A single platform for AI-powered work**  
Unify productivity, security, identity, and compliance in one solution.
- ✓ **Simplified licensing and faster decisions**  
Reduce tool sprawl and procurement complexity with an all-in-one bundle.
- ✓ **More value than standalone solutions**  
Unlock cost efficiencies through bundled capabilities versus individual purchases.
- ✓ **Faster time-to-value with fewer dependencies**  
Deploy AI capabilities without stitching together multiple tools or vendors.

## The operating model for secure AI

## Secure Governance as AI Scales

Maintain control, security, and trust as AI adoption grows

- ✓ **Enterprise-grade security built in**  
Protect users, data, and AI activity using trusted security controls.
- ✓ **Consistent protection everywhere work happens**  
Apply the same security and compliance standards across people, data, and AI.
- ✓ **Confidence to scale without increasing risk**  
Expand AI usage while maintaining governance, visibility, and control.
- ✓ **Prepared for evolving regulatory and compliance needs**  
Support AI adoption with controls designed to adapt as requirements change.
